Our hatcher is designed with maximum attention to the demands in your hatchery. The aim was to make effective cleaning easier and at the same time obtain outstanding good hatching results. The result is a hatcher with hardly any internal components. The cooling elements are placed inside the cabinet-panels and the cable connections are located in external tubes. Even the fans are specially designed not to leave any space for dangerous bacteria. No awkward corners, -nothing but stainless steel. A machine which will serve you for many years.
