"In our test, the Set & Hatch equipment gave by far the best hatching results and the best chick quality. It was therefore an easy decision. Having used the equipment now for three years, we would like to emphasise, in particular, the unique cooling/heating system of the setter which eliminates cold/hot spots in the machine. In addition, the control system allows us to set eggs when it is convenient for us. The hatcher has a superior ventilation which gives the chicks the very best conditions. The Set & Hatch system is well designed, from its user-friendly tray system to the easy cleaning of the hatcher, - and it makes our daily work very easy".
