Fax: +45 96 60 15 01

Hatching results must be compared on an equal basis and it is not only the quantity of chickens that counts. Records from independent authorities have proved that chickens hatched in LINCO Set & Hatch equipment have a lower mortality, higher growth rate and a better feed conversion rate.

In field tests, Set & Hatch has given at least 2% more chicks than any other equipment in the same trial, - and the high quality of the hatched chicks improved the results further.

Whether incubating "Multistage" or "All in - all out" you are always sure that Set & Hatch will give the ultimate result.

Real hatching power
