

Chick delivery box

The ideal box for transport of day-old-chicks

Its inside height of 14 cm prevents the chicken from jumping out. When stacked it takes up only 11 cm, as the bottom part is nested into the top of the box below. This also protects the chicken against injury when the boxes are stacked.

Easy cleaning

The bottom of the box is constructed with oblong holes to avoid small eggshell pieces to get stuck, and all corners are rounded to ensure effective washing. In traditional boxes the shell pieces will stay even after heavy washing, thus exposing the chicken to cross contamination.

Efficient ventilation

The very open construction of the side ribs with the narrow side outwards, ensures that the chicken get far better ventilation during storing and transport.

Strong construction

Reinforced with a double bar in the top frame, the box has a high durability even when stacked in high piles and exposed to harsh handling, whereas traditional chick boxes often break in the top corners.

Capacity:	100 day-old-chicks
Material:	Polyethylene HPDE
Colour:	Green (standard). Other colours as option
Dimensions:	60 x 40 x 15 cm
Height inside:	14 cm
Height (stacked):	11 cm
Weight:	1400 g
Q'ty in 20'/40'/40'HC cont:	1020 / 2100 / 2312 boxes
